

DATASHEET

The Ambu® Subdermal Corkscrew and Ambu® Subdermal Twisted Pair Corkscrew electrodes are stainless steel electrodes which are to be screwed into the scalp of the patients. The electrodes are designed with an ergonomic grip, color coded lead wires and come with 1.5 mm touch proof DIN 42802 connectors.

The corkscrew electrodes are developed to be used for monitoring, recording and stimulation of bio- and nerve potential signals.

Ambu® Subdermal Corkscrew Ambu® Subdermal Twisted Pair Corkscrew

KEY FEATURES

Designed with an ergonomic grip for comfort

Needle electrode made of stainless steel

Color coded lead wires assist the identification of electrodes

1.5 mm touch proof DIN 42802 connectors

RECOMMENDED APPLICATIONS

Intraoperative Monitoring (IOM)

Electroencephalogram (EEG)

Evoked Potentials (EP)

Ambu
